

Testimonials

These will be actual testimonials from clients and will evolve as new testimonials are received.

Product Teaser (True Farm to Jar pain relief)

We wholeheartedly believe our methods produce the best herbal remedies you can practice! Our team of passionate herbalists have always known that the quality of the final output depends of the quality of the herbs used.

Learn to make our Magic Salve, a herbal product our customers have been enjoying the benefits of for decades. We have formulated a recipe for a wide variety of uses, such as topical pain relief, scar tissue healing, friction rash, skin dryness and itching, such as from eczema or psoriasis, lip and skin moisturization, cracked hands and feet, and even more!

Come and try some yourself!

What to expect

Always working in small batches, we employ both technical and ancient methods in our production. We focus on excellence in our products to assure we receive what we expect from our efforts. With a positive vibe, we fully believe that what we put in, we get out of our work

Our Story

Our story began in 1998, when Jasmyn, Clinical Herbalist had a dream of spreading her remedies among a world of pharmaceuticals. Starting with her Magic Salve and Sore Muscle Rub, she created a line of recipes and techniques to deliver topical relief from pain, soothe ailments, and boost one's health.

Over the following years she has perfected her formulas, and dreamed up more, mastering the technical methods of production and extraction. Adjustments to our products over the years with feedback from our customers across BC have led to an extraordinary selection, with our flagship balms leading the way.

Our clients have used these balms for relief from conditions like arthritis, fibromyalgia, skin disease, muscle damage, chronic pain and other long term conditions. Our wide range of customers have been fundamental to our ability to tune in our recipes, and their feedback has been key to our success in doing so.

We have been mailing our products across Canada for more than two decades, and we include testimonials from our clients on the pages of this website. Check them out to see some of the fantastic ways our clients use the products you can find in our store.

We are committed to excellence in both our medicinal extraction techniques and the plants we carefully turn into our products. We lease organic, valley farmland on lush Saltspring Island, BC, to grow most of our plants used in our herbal products and forage the remainder which are not suitable for a farming environment. All products are grown naturally, with no use of pesticides, herbicides, or fungicides, to best maintain the health of the environment, and you.

All harvesting happens with a positive vibe, using both high tech and ancient methods. We are delighted to share these extraordinary products and traditions with you. If you are one of our amazing students, or our fantastic clients, thank you so much for your support.

Sincerely, the Wild Seed Team

Product Description

We use high performance, plant derived components to formulate a top tier line of herbal products that suit a variety of needs. We are committed to the plants we turn into these products, lovingly raising them ourselves. Once our harvest is dried, they are thoroughly inspected for the grade and quality we require. All our methods are honed through time and learning in the environment and all our products are 100% free of animal testing. Each batch is tested by a third party lab to ensure the molecular profile is perfect before sale.

We are proud to use both high tech and ancient methods of catching the constituents we use. These are the relevant chemicals in the plants that have a medicinal effect on the body. We love the time tested process that we have developed and we think you will too! Each small batch is processed by hand with utmost care, to deliver you farm to jar medicine.

What we do

We are a small batch herbalist producer located on Saltspring Island. Our mission is to spread pain relief, good vibes and knowledge. In addition to our products available in our store, we also teach our

methods to aspiring herbalists. We hold a monthly, week long intensive course that instructs a robust set of knowledge. There are four grades of instruction, and opportunities to apprentice with us to learn more. See below for our upcoming classes, and contact us to learn more!

A calendar of class dates will be inserted here.

Reviews

Reviews curated from customers will be emplaced here.

Items

WooCommerce shopfront API will be embedded here.

I unfortunately don't have the shop item images in time for this assignment, but I have been assured that they will be ready for the actual website.

Contact Form

A contact form to send reviews, requests or applications will be embedded here, with lines for first and last name, email, phone and message.
